## COMPANY PROFILE

Balonevi was founded in September 2001 and we have never compromised on our principles of product quality, competitive pricing and on-time delivery. Believing in the principle of "Customer Satisfaction" we have become the leader in our sector.

### The Highest Quality and State of the Art Technology

In addition to manufacturing a range of shapes and sizes to European standard levels of production quality, we have added automatic feeding technology to our four-color register silk screen printing system that is completely unique in Turkey.

All of our production, 5"-9"-10"-12"-18"-24" round; 5" and 12" heart and 260 modelling balloons are made to international standards from natural latex. We have a production capacity of 20 million balloons/month and a screen printing capacity of 10 million/month. We are one of the few companies in the world who has four-colour register and all-round screen printing technology. We claim that, we keep one step ahead of world technology on balloon production and screen printing.

### Rich Varieties and Innovative Approaches

We not only manufacture latex balloons, soap bubbles, paper plate & cups, party accessories but also we distribute a variety range of party products such as tablewares, foil balloons, paper decorations, costumes and party accessories, etc.

Another product of us is our "Cha cha balloon", which has made a real difference to the world of printed balloons, is one result of our innovative approach. And our patented "single piece balloon stick" is another output of the same approach.

A further innovative approach of ours is the concept of our Balonevi Party Stores. All of our stores which located different areas of Turkey, are the "one and unique" of their kind in Turkey. Our customers can find everything and every service needed for a party in these stores.

### A Rich Portfolio of Licensed Characters

Disney Mickey & Minnie Mouse and Friends, Frozen, The Cars, Disney Princesses and Sofia, PJ Masks, Baby Shark, Paw Patrol, Sonic the Hedgehog, Niloya, Rafadan Tayfa, Major Sport Clubs of Turkey: Beşiktaş, Fenerbahçe and Galatasaray, are our licenced characters. So Balonevi is leading licenced party market in Turkey with wide range of licensed characters. In addition to Balonevi's licences and product range, we also distribute some worldwide leaders products such as Asmcn and Procos, etc.

### Quality Management and Product Safety

All of our products are approved by accredited laboratories. Within 5 years, any balloon produced from natural raw materials can be completely returned to nature. For both product quality and human health, we are fully aware of the importance of the chemicals used in our production processes, and we always act in line with this awareness. We always follow up national and international standards and apply them to all of our products. We ensure 2009/48/EC European Union Toy Safety Directive and conditions according to this directive. We prove our suitability to this directive by achieved EN71 tests.

### Choose Balonevi for healthy products!

According to Toy Safety Directives published on 4th of October 2016, an important criteria for balloons is Nitrosamine limits. We have been working on Nitrosamine issue since 2011 and we already did necessary works before this directive published. We certify that we keep our production process under control by the analysis that are done periodically. We keep our product safety and quality under guarantee by applying ISO 9001 standards. Plus, we keep our ISO 9001 quality certificate (that was given by TUV Rheinland at 2013) always updated.

## PRODUCTION

### Balloon Production

Main raw material of balloon is totally natural.

Natural rubber latex (raw material of latex balloon) is acquired from rubber tree's.

Some additional hygienic chemicals are added in production process. Then, some of those chemicals are purified during the production process to get the best possible natural latex balloon.

Balonevi is doing production in it's own facility with energy efficient and environment friendly methods. The main target is to get maximum energy efficiency while doing production.

As Balonevi, we are doing world class production with using full automatic balloon production machines developed by our research & development department and by technology development project developed by Tubitak.

### Balloon Printing

We are one of the rare companies that have 4 color and all around silk screen printing technology. Balonevi is one step ahead of world technology with silk screen balloon printing and balloon production.

### Soap Bubbles

Another entertaining product like latex balloon is produced by Balonevi, is soap bubble. We produce soap bubble on our machine which fills in tubes, closes caps and labels automatically. Our main production principle is human health. So, like for all of our other products, we got all necessary analysis certificates for every single chemicals used in bubble liquid. We are doing all test and analysis studiously.

All EN71 tests analysis for our own manufactured products are made by worldwide known laboratories.

### Paper Plate Production

Paper plate production is our new focus.

To create innovation, we have started to produce much deeper paper plates. We supply them to our customers with enriching our designs. Regulatory compliance and quality are our basic principles. Because of this reason, all of our products are documented with related test reports & certificates.

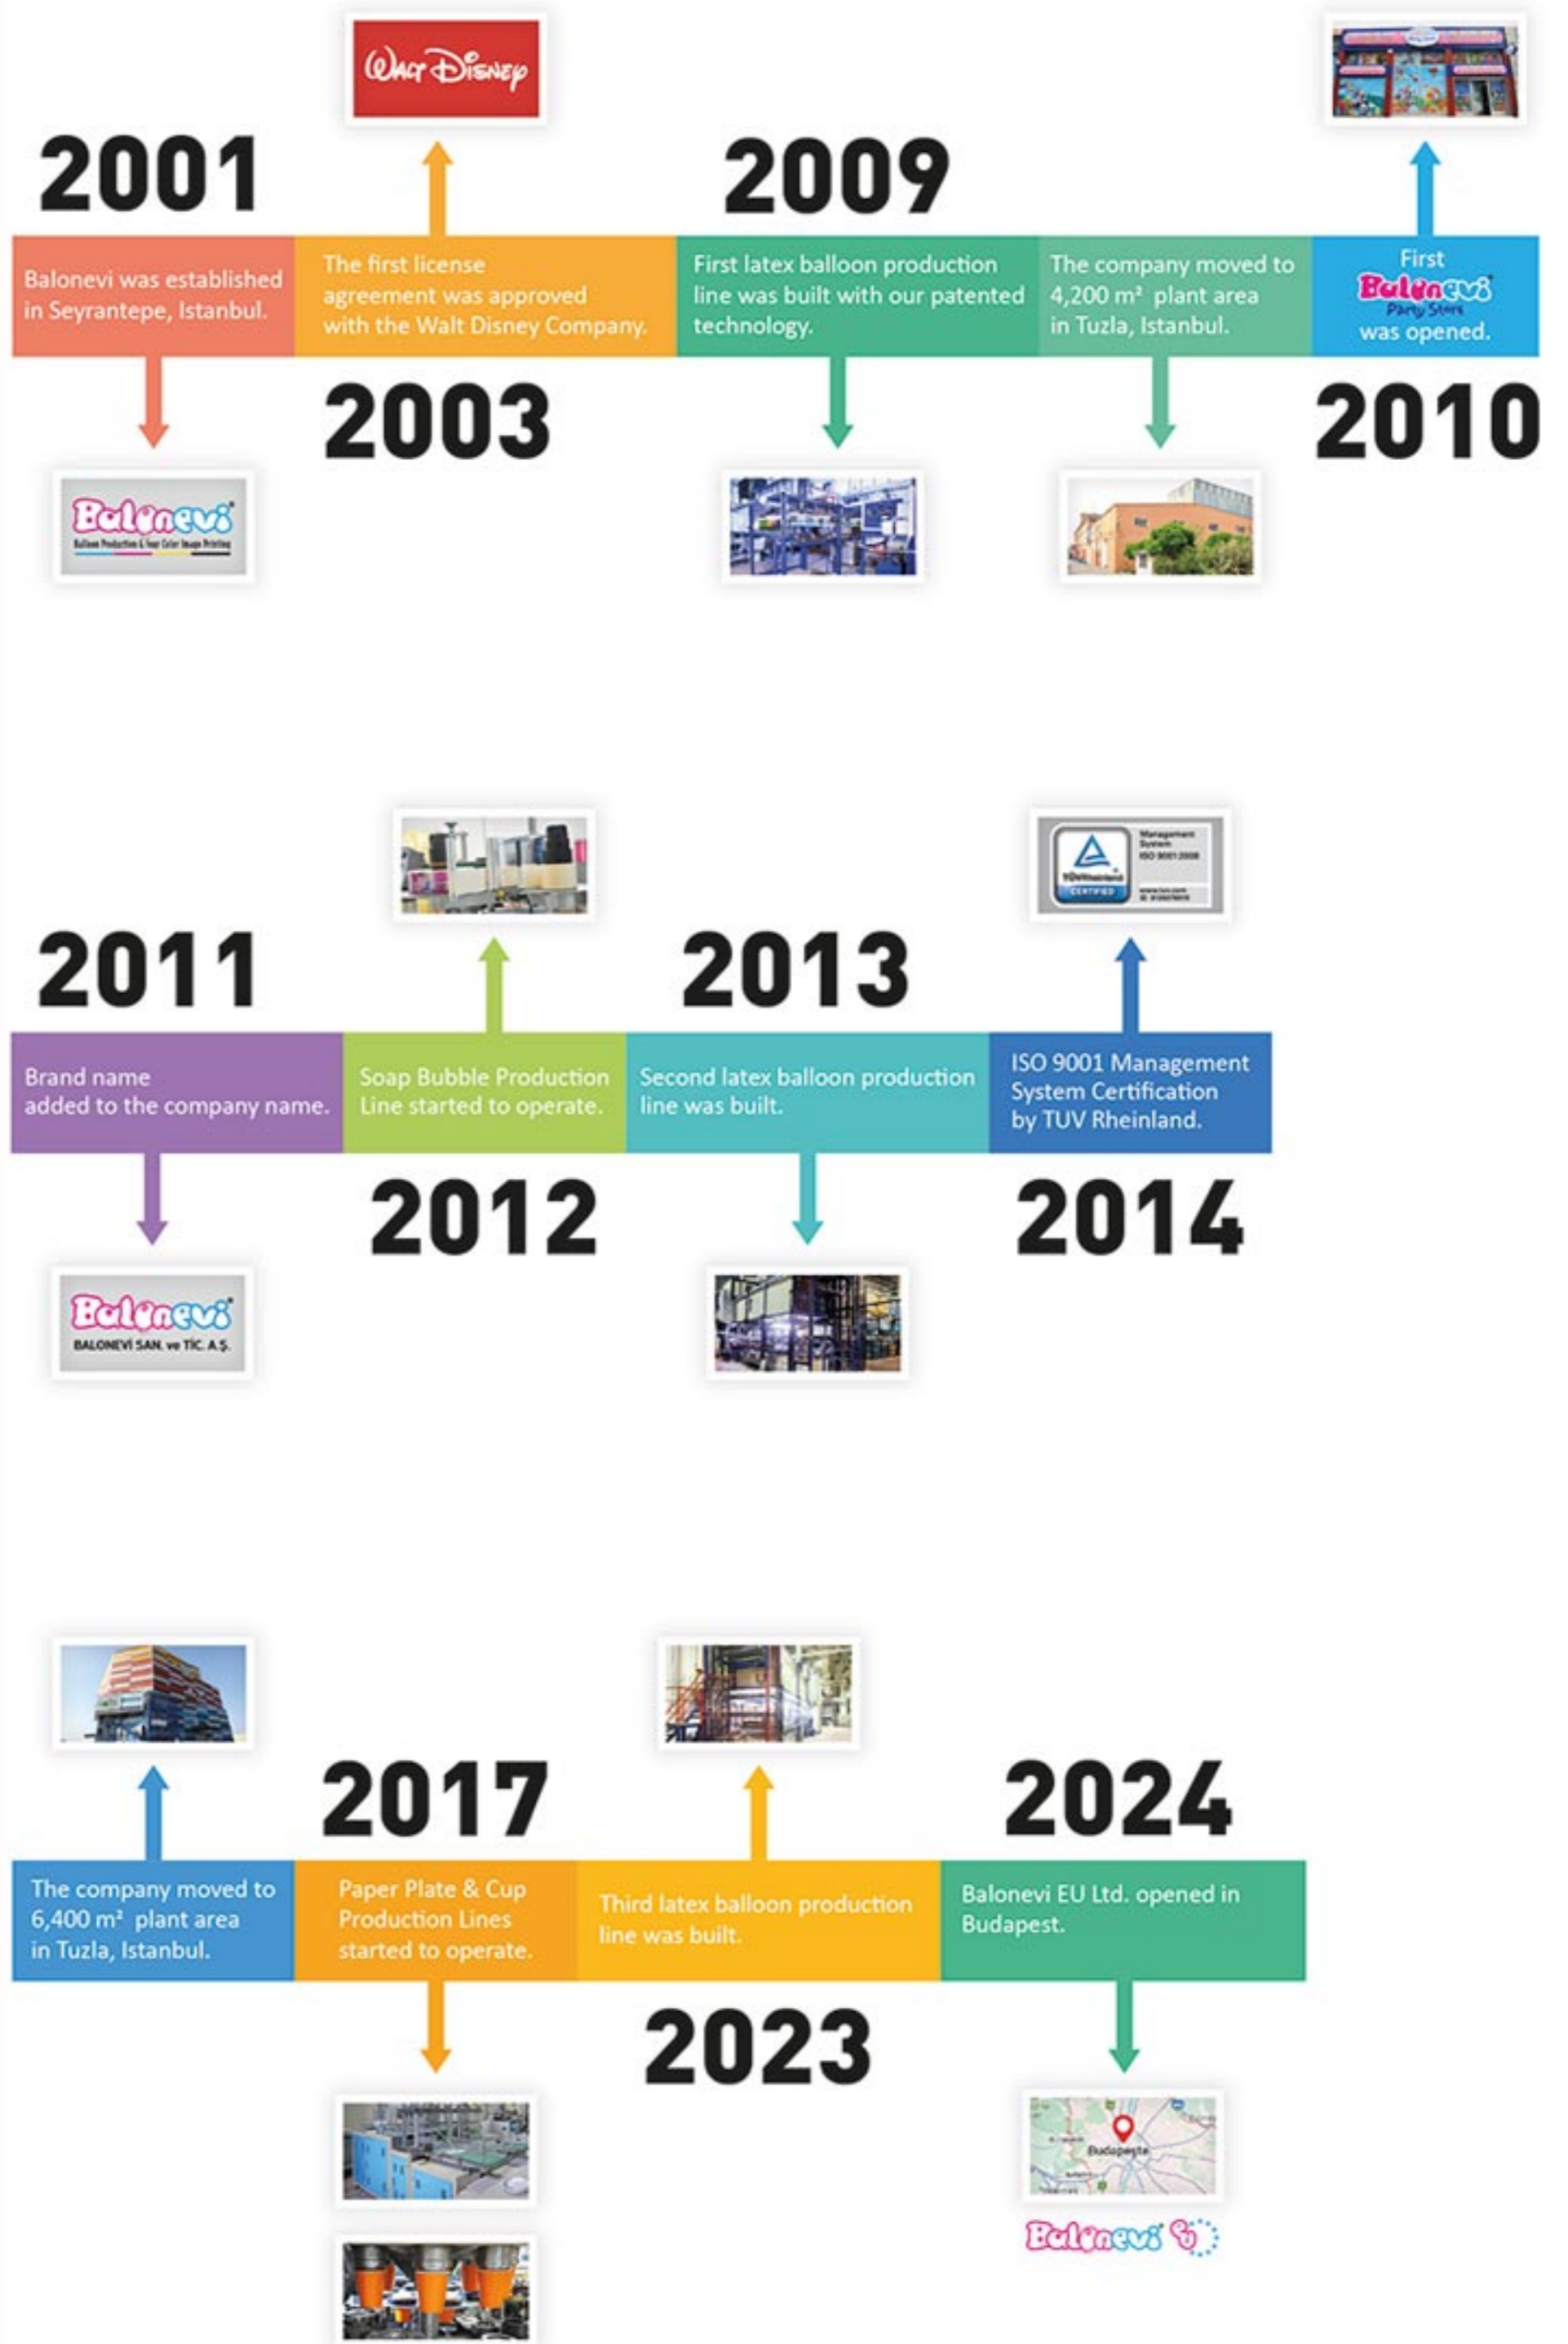

### Paper Cup Production

One of our new production area is paper cup. Currently, we are doing production as single size: 8 oz. We supply them to our customers with enriching our designs. Regulatory compliance and quality are our basic principles. Because of this reason, all of our products are documented with related test reports & certificates.

## COMPANY MILESTONES

Now Balonevi has become Türkiye's largest and Europe's fourth largest latex balloon manufacturer with production capacity of 300 million latex balloons/year.
